

CLAIM SUMMARY

✓ Claims 1-9: (Canceled)

CI Cont.

Claim 10: (Currently Amended) A paper product comprising first and second paper sheets each having first and second opposite paper surfaces with said first paper surfaces being in substantially planar contiguous surface-to-surface opposing relationship at both major and minor opposing surface area portions thereof, said major and minor opposing surface area portions of said first and second paper sheets first paper surfaces being adhesively bonded to each other, a line of perforations in said first and second paper sheets which is adapted to be torn to facilitate the separation of said major and minor opposing surface area portions from each other, said major opposing surface area portions being devoid of germination seeds therebetween, and a germinative seed housed between said minor opposing surface area portions which minor opposing surface area portions and the germinative seed housed therein can be ~~subsequently~~ planted entirely bodily removed as a plantable unit from said major opposing surface area portions along said lines of perforations for subsequent planting absent adversely affecting, damaging or destroying the major opposing surface area portions.

Claim 11: (Previously Added) The paper product as defined in claim 10 wherein said line of perforations is a substantially continuous line of perforations.

Claim 12: (Previously Amended) The paper product as defined in claim 10 wherein said line of perforations has opposite ends.

Claim 13: (Previously Amended) The paper product as defined in claim 10 wherein said line of perforations extend substantially between edges of said sheets.

Claim 14: (Previously Amended) The paper product as defined in claim 10 wherein said line of perforations extend substantially between opposite edges of said sheets.

Claim 15: (Previously Added) The paper product as defined in claim 10 wherein said line of perforations is a substantially continuous closed line of perforations.

Claim 16: (Previously Amended) The paper product as defined in claim 10 wherein said minor opposing surface area portions of said first and second paper sheets first paper surfaces are adhesively bonded to each other.

Claim 17: (Previously Added) The paper product as defined in claim 10 wherein a decomposable adhesive bonds said major opposing surface area portions to each other.

Claim 18: (Previously Added) The paper product as defined in claim 10 including means for indicating the presence of said germinative seed between said minor opposing surface area portions.

CI
Cont. Claim 19: (Previously Added) The paper product as defined in claim 10 wherein said major opposing surface area portion provides means for defining an address field.

Claim 20: (Previously Added) The paper product as defined in claim 10 wherein said major opposing surface area portion provides means for defining an inscription field.

Claim 21: (Currently Amended) The paper product as defined in claim 10 wherein said major opposing surface area portion provides means for defining ~~an~~ a calendar field.

Claim 22: (Previously Added) The paper product as defined in claim 16 wherein said line of perforations is a substantially continuous line of perforations.

Claim 23: (Previously Amended) The paper product as defined in claim 16 wherein said line of perforations has opposite ends.

Claim 24: (Previously Amended) The paper product as defined in claim 16 wherein said line of perforations extend substantially between edges of said sheets.

Claim 25: (Previously Amended) The paper product as defined in claim 16 wherein said line of perforations extend substantially between opposite edges of said sheets.

Claim 26: (Previously Added) The paper product as defined in claim 16 wherein said line of perforations is a substantially continuous closed line of perforations.

Claim 27: (Previously Added) The paper product as defined in claim 16 including means for indicating the presence of said germinative seed between said minor opposing surface are portions.

Claim 28. (Currently Amended) A paper product comprising a plurality of pairs of first and second paper sheets each having first and second opposite paper surfaces with said first paper surfaces of each pair being in substantially planar contiguous surface-to-surface opposing relationship at both major and minor opposing surface area portions thereof, said major and minor opposing surface area portions of said first and second paper sheets first paper surfaces of each pair being adhesively bonded to each other, a line of perforations in said first and second paper sheets of each pair which is adapted to be torn to facilitate the separation of said major and minor opposing surface area portions from each other, and said major opposing surface area portions being devoid of germination seeds therebetween, a germinative seed housed between said minor opposing surface area portions of each pair which minor opposing surface area portions and the germinative seed housed therein can be subsequently planted entirely bodily removed as a plantable unit from said major opposing surface area portions along said lines of perforations for subsequent planting absent adversely affecting, damaging or destroying the major opposing surface area portions, and means for connecting said pairs together.

Claim 29: (Previously Added) The paper product as defined in claim 28 wherein said connecting means are located along a common edge of said pairs.

Claim 30: (Previously Added) The paper product as defined in claim 28 wherein each of said pairs defines a calendar field.

Claim 31: (Previously Added) The paper product as defined in claim 28 wherein each of said pairs defines a calendar field and a post card field set-off by each line of perforations.

C/
Concluded
Claim 32: (Previously Added) The paper product as defined in claim 31 wherein each line of perforations extends substantially between opposite edges of each of said pairs.
